Section 1
General Provisions

1.1 Introduction:

1.1.1 Customs organizations all over the world are tasked with the twin challenges of securing the borders from unlawful trade and at the same time facilitating the legitimate trade. Trade security and facilitation is one of the key determinants for the economic development of the countries. Customs, being the government organization that controls and administers the international movement of goods, is in a unique position to provide increased security to the global supply chain and to contribute to socio-economic development through revenue collection and trade facilitation. With a view to secure the international supply chain, the World Customs Organization had in June 2005 adopted the SAFE Framework of Standards to secure and facilitate global trade. Since then, this unique international instrument has ushered in modern supply chain security standards with the help of a closer partnership between Customs and business in the form of Authorized Economic Operator (AEO) programme, which constitutes one of the three pillars on which SAFE Framework rests. The AEO programme seeks to provide tangible benefits in the form of faster Customs clearances and simplified Customs procedures to those business entities who offer a high degree of security guarantees in respect of their role in the supply chain. The SAFE Framework sets forth the criteria by which businesses in the supply chain can obtain authorized status as a secure partner. Such criteria address issues such as threat assessment, a security plan adapted to the assessed threats, procedural measures to prevent illegitimate goods entering the supply chain, physical security of buildings and premises used as loading or warehousing sites, and security of cargo, means of transport, personnel and information system.

1.1.2 Over the years, AEO has become a flagship programme for WCO Members as it offers an opportunity for Customs to share its responsibilities with the businesses, while at the same time rewarding them with a number of additional benefits. As of March, 2015, 168 out of 180 WCO Members have signed Letters of Intent committing to implement the SAFE Framework. In India, the AEO programme was launched in 2011.

1.1.3 Prior to adoption of the SAFE Framework by WCO in 2005, Customs administrations all over the world, including India, were already implementing various forms of Customs compliance programmes which focused on compliance with traditional areas of Customs requirements, and which can also be considered as trade facilitation programmes, based on the Revised Kyoto Convention's "authorized persons" provisions. In India, this programme was known as Accredited Client Programme (ACP). On the other hand, Article 7.7 (Trade Facilitation Measures for Authorized Operators) of the WTO Trade Facilitation Agreement (TFA) also provides for implementation of "Authorized Operator" scheme on the basis of international standards, where such standards exist.

1.1.4 In the light of these international developments, as well as in view of the focus of the Government of India on "Ease of Doing Business", it is imperative to develop a comprehensive unified trade facilitation programme by incorporating the existing ACP scheme and ongoing AEO

programme into a revised AEO programme providing additional facilities to the legitimate trade who have demonstrated strong internal control system and willingness to comply with the laws

administered by the Central Board of Excise and Customs. The objective of the revised AEO Programme shall continue to remain same as earlier that is to provide businesses with an internationally recognized quality mark which will indicate their secure role in the international supply chain and that their Customs procedures are efficient and compliant. An entity with an AEO status can, therefore, be considered a 'secure' trader and a reliable trading partner.

1.2 Three tier AEO programme for importers and exporters (AEO-T1, AEO-T2, and AEO-T3)

It has been decided that the existing ACP and AEO programmes will be merged into this new AEO programme. Section 3

Eligibility conditions and criteria for granting the AEO certificate

3.1 Who can apply for AEO certificate?

3.1.1 Anyone involved in the international supply chain that undertakes Customs related activity in India can apply for AEO status irrespective of size of the business. These may include exporters, importers, logistic providers (e.g. carriers, airlines, freight forwarders, etc.), Custodians or Terminal Operators, Customs House Agents and Warehouse Owners. Others who may qualify include port operators, authorized couriers, stevedores. The list is not exhaustive.

3.1.2 Businesses that are not involved in Customs related work / activities will not be entitled to apply. This means that in general, banks, insurance companies, consultants and the like categories of businesses will not be eligible for AEO status.

3.1.3 Application for AEO status will only cover the legal entity of the applicant and will not automatically apply to a group of companies.

3.1.4 There is no provision to grant AEO status to specific site, division or branch of legal entity of the applicant. The application must cover all the activities and locations of the legal entity involved in the international supply chain and the prescribed criteria will be applied across all those activities and locations.

3.1.5 In order to apply for AEO status the applicant must be established in India. For this purpose, the applicant should provide evidence which may include:

- (i) A certificate of registration issued by the Registrar of Companies.
- (ii) Details of places/locations where goods are being handled, e.g. loading, unloading, storage etc., in the course of supply to/from international supply chain.
- (iii) Proof that the business has its own accounts.

3.1.6 The applicant should have business activities for at least three financial years preceding the date of application. However in exceptional cases, on the basis of physical verification of internal controls of a newly established business entity, the AEO Programme Manager may consider it for certification.

3.1.7 Keeping the small and medium scale enterprises in mind it has been decided the AEO programme is made open to all Importers/Exporters whose threshold of import or export declarations is 25 documents i.e. either Bills of Entry or Shipping Bills during the last financial year. The other economic operators should have handled at least 25 documents i.e. Bills of Entry or Shipping bills during the last financial year.

3.1.8 An AEO status applies only to the legal entity applying for such status in its own capacity and covering its role in the international supply chain. Therefore, AEO status can be granted to a Customs Broker, but this will not confer similar status on its client importers / exporters who will need to apply separately for that status.

3.1.9 The AEO Programme is open to all economic operators, including micro, small and medium enterprises (MSMEs) and the eligibility conditions and criteria for granting the AEO Certificates are the same for all economic operators regardless of their size. However, the AEO Programme Manager shall take due account of the specific characteristics of economic operators, in particular of MSMEs, while applying the eligibility conditions and criteria prescribed under paras 3.3 (relating to management of commercial and transport records), and those under paras 3.5 (relating to safety and security) for granting the above AEO Certificates. The AEO Programme Manager shall take into account such factors as the size of the MSMEs, the legal status (e.g. proprietorship, partnership etc), the structure, the key business partners and also the specific economic activity of the economic operator while applying these eligibility conditions and criteria specified under paras 3.3 and 3.5. In particular, the AEO Programme Manager shall take into account the possible difficulties for MSMEs in meeting with these eligibility conditions and criteria under paras 3.3 and 3.5 with a view to make the above AEO certificates more available to MSMEs. The criteria of turnover indicated in MSME Act would be taken into consideration for categorization of entities into Micro, Small and Medium Enterprises.

3.1.10 DG(Systems), CBEC will progressively introduce an ICT based solution, which will not only cater to the management of AEO enrolment life-cycle but will also help ensure that all Authorized Economic Operators receive high quality service. All communication between AEO/AEO applicants and Programme Manager shall be through e-mail at Aeo.India@icegate.gov.in.

3.2 Legal Compliance:

3.2.1 There should be no show cause notice issued to them during last three financial years involving fraud, forgery, outright smuggling, clandestine removal of excisable goods or cases where Service Tax has been collected from customers but not deposited to the Government.

3.2.2 There should be no case wherein prosecution has been launched or is being contemplated against the applicant or its senior management.

3.2.3 If the ratio of disputed duty demanded or drawback demanded or sought to be denied, in all the show cause notices issued under the Customs Act, 1962 (other than those mentioned in Para 3.2.1 and 3.2.2) during the last three financial years, to the total duty paid and drawback claimed

during the said period is more than ten percent, a review would be taken of the nature of cases and decision would be taken on issue or continuance of AEO status by AEO Programme Manager.

Explanation: for para 3.2.1, 3.2.2 and 3.2.3 above, the cases where the show cause notices have been dropped or decided in favour of the applicant by the adjudicating or appellate authorities will not be considered.

3.2.4 An applicant will also need to demonstrate that he has:

- i. procedures in place to identify and disclose any irregularities or errors to the Customs authorities or, where appropriate, other regulatory bodies.
- ii. taken appropriate remedial action when irregularities or errors are identified.

3.2.5 Once an error has been identified, the applicant is expected to take steps to ensure that they do not happen again or, at least, to ensure that they are immediately remedied if they do arise. Failure to take such steps could count against applicant.

3.3 Managing commercial and (where appropriate) transport records:

The applicant should have a satisfactory system of managing commercial and, where appropriate, transport records. To enable the AEO Programme Manager to establish that the applicant indeed has such a system, the applicant shall:

- i. Maintain an accounting system consistent with Generally Accepted Accounting Principles (GAAP) / International Financial Reporting Standards (IFRS) which facilitates audit-based Customs control;
- ii. Have an administrative set up which corresponds to the type and size of business and which is suitable for the management of the flow of goods, and have internal controls capable of detecting illegal or irregular transactions;

Further, the applicant should not have defaulted in payment of due Customs duties during the past three years.

The applicants must submit an undertaking regarding its solvency and a Solvency Certificate issued by the Statutory Auditor of the applicant.

3.5 Safety and security

3.5.1 The applicant must have in place appropriate internal controls and measures to ensure safety and security of applicant's business and his supply chain, in addition to any specific legal requirements that may be applicable to the business. In order to satisfy the requirements of AEO status, the applicant will need to ensure security of procedures, cargo, procedures, conveyances, premises, personnel and business partners. The applicant's security and safety standards shall be considered to be appropriate if the following conditions are fulfilled:

3.5.2 Procedural Security

In order to ensure security of the international supply chain, the applicant must have in place appropriate internal controls and measures to ensure safety and security of procedures relating to applicant's business and his supply chain. With this view, following criteria should be fulfilled by the applicant:

- i. The applicant should develop and maintain a security policy and procedure manual which shall contain detailed guidelines on procedures to be followed to preserve the integrity of the cargo while in its custody, loading and unloading from transport conveyance and during transport. The manual should also stipulate how seals are to be controlled and affixed to cargo and transport conveyances.
