

**Required Report:** Required - Public Distribution **Date:** January 02, 2023

**Report Number:** MY2022-0018

**Report Name:** Exporter Guide

Country: Malaysia

Post: Kuala Lumpur

Report Category: Exporter Guide

**Prepared By:** Rowena Ngumbang

Approved By: Karen Richards

# **Report Highlights:**

Malaysia retail food and HRI sector is expected to grow by 7.8 percent in 2023. U.S. exporters will see excellent opportunities in the retail food and food processing sectors as the country's economy rebounds strongly after the COVID-19 pandemic shutdowns.

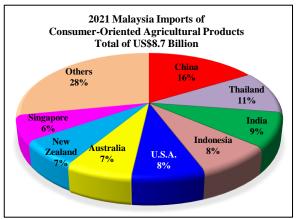

#### Market Fact Sheet: Malaysia

#### **Executive Summary**

Malaysia's gross imports are expected to increase in 2023 by 0.2 percent driven by an increase in food and beverage consumption and increased spending by consumers. Although the country's halal requirements complicate trade for certain products, Malaysia's trade and regulatory policies are relatively open and provide opportunities for a broad range of imported foods and beverages. Malaysia's total agricultural related product imports in 2021 reached \$23 billion USD, roughly 6 percent of which was sourced from the United States.

#### **Imports of Consumer-Oriented Products**

In 2021, the United States was Malaysia's fifth largest supplier of consumer-oriented food and beverage products, with total sales reaching \$650 million USD for the year. Top U.S. products in the market include prepared food, dairy, processed vegetables and fruits, fresh fruits, and tree nuts.

Source: Trade Data Monitor

#### Hotel, Restaurant and Institutional

The Malaysian hotel, restaurant, and institutional (HRI) industry used to be one of the fastest growing sectors in the country prior to COVID-19, and it is showing signs of a strong recovery thanks to economic reopening and high vaccination rates. The HRI sector is expected to fully recover in 2023.

#### **Retail Food**

Malaysia's food retail sector has increased, especially in response to consumer demand for natural and healthier products due to the onset of the global pandemic. A

significant growth and trend towards e-commerce that has proven to be the country's most dynamic channel throughout 2020 to 2023, including the steady growth of convenience stores.

#### **Food Processing**

The Malaysian food processing industry also joins the recovery momentum leading into 2023 for the export and domestic market. Several multi-nationals have regional production facilities in and around Kuala Lumpur, and the Government of Malaysia has identified the food processing industry as a critical sector for future economic growth.

#### **Malaysia Macroeconomics**

**Population:** 32.7 million people; rapidly growing (has doubled since 1980) and is increasingly urbanized

**GDP Per Capita Income**: \$10,781 in 2021, with a growing middle class

Real GDP Growth: 14.2 percent in Q3 2022

driving demand for	
high-quality imported	
food and beverage	
products.	

#### **SECTION I: MARKET OVERVIEW**

Malaysia's population of nearly 33 million is an increasingly urbanized market with a high demand for imported food and beverages. Despite only moderate economic improvement in 2021, the retail food and HRI sector is expected to grow by 7.8 percent with a significant increase attributed to the implementation of the Tourism Recovery Framework 2.0 launched in June 2022. The country's economy is on the road to recovery, with almost all economic sectors reopening. As locals resume regular social activities and international tourists return, the country expects to see robust demands on the food and beverage industry in 2023.

Although the country's strict halal requirements complicate trade for certain products, Malaysia's trade and regulatory policies are relatively open and provide opportunities for a broad range of imported food and beverages. Malaysia's total agricultural product imports in 2021 reached \$23 billion USD, roughly six percent of which was sourced from the United States.

#### SECTION II: ROAD MAP FOR MARKET ENTRY

U.S. exporters of food and agricultural products should consider the following when planning to enter the Malaysian market:

- Analyze Malaysian food laws, packaging & labeling requirements, and importer criteria for entry
  into the market. Detailed information on Malaysian regulations and requirements can be found
  by accessing the latest FAS/Malaysia Food and Agricultural Import Regulations & Standards
  Country Report at the following web portal: <a href="https://gain.fas.usda.gov/">https://gain.fas.usda.gov/</a>.
- Review the types of U.S. products that can be readily targeted in the market. Consider the price competitiveness of U.S. products compared to similar products available in Malaysia.
- Participate in regional trade shows and trade missions by tapping into the resources offered by State and Regional Trade Associations.
- Develop links with local importers that target the major retailers, hotels, restaurants, and processors. U.S. exporters are advised to appoint local distributors, or at least a local representative to help guide them through the requirements of Malaysian food regulations and local trading practices.
- After establishing links with importers, strive to educate them (in person if possible) on the qualities of your product/s and supply chain.
- After establishing agreements with local importers, conduct product promotions with end-users.
   This type of marketing event is particularly effective during festivals and peak seasons (Chinese New Year, Ramadan, Christmas, etc.).
- Provide technical assistance (e.g., handling techniques, chef trainings and product formulations) to end-users.
- Maintain strong communication with your local importer to ensure all certificates and import permits are valid and up-to-date.

# SECTION III. NATIONAL FOOD STANDARDS & TRADE REGULATIONS/PROCEDURES

Malaysia's Food Act 1983 and the Food Regulations of 1985 govern food import and export regulations/procedures. The Food Safety and Quality Division (FSQD) of the Malaysian Ministry of Health (MOH) along with several other government agencies are charged with implementing and enforcing the law under these statutes, including routine compliance, sampling, inspection, import control and regulation. Among the many regulations and required procedures related to shipping food and agricultural products to the country, of note are Malaysia's halal certification and dairy facility registration requirements:

## **HS Code Classification**

For composite products other than raw food ingredients it is important to comply with import requirements under Food Act 1983 and its regulations before exporting to Malaysia. Please work with your local importer to ensure that your product is accurately classified with the Royal Malaysian Customs Department to avoid detainment and delay at the port of entry. For further details on food export activities into Malaysia, please refer to Ministry of Health – Food Safety and Quality Section.

#### **Halal Certification**

Many food products (e.g. beef and poultry) require halal certification in order to enter the country. Currently, the Islamic Development Foundation of Malaysia (JAKIM) is the only authorized entity allowed to issue halal certification. In the United States, JAKIM has appointed three Islamic institutions to inspect, and halal certify food and beverage products for export to Malaysia: the Islamic Food and Nutrition Council of America (IFANCA), Islamic Services of America (ISA), and the American Halal Foundation (AHF). For further details on halal requirements in Malaysia market, please refer to Malaysia: Halal Country Report

# **Dairy Facility Registration**

In March 2018, Malaysia implemented a measure that requires foreign producers and exporters of dairy products to apply for registration with the Malaysian Government. According to trade contacts, the Malaysian Government implemented this facility registration measure to improve the traceability of imported dairy products and to ensure imported dairy products are certified halal. New to market suppliers must undergo a standard review process lasting three to six months.

For further details on dairy and other food export requirements in the Malaysia market, please refer to the USDA Food Safety and Inspection Service Export Library.

#### SECTION IV. MARKET DYNAMICS AND TRENDS

# **Food Industry Breakdown**

The Malaysian hotel, restaurant, and institutional (HRI) industry is one of the fastest developing sectors with an estimated share change at 29.5 percent in 2022 and forecasted 7.8 percent growth rate into 2023. This growth will significantly accelerate the economic recovery in the food and beverage industry by increasing demand of imported consumer-oriented products. Please refer to the most recent FAS Malaysia Hotel, Restaurant, and Institutional GAIN report for more details on the sector.

Several multi-nationals have regional production facilities in and around Kuala Lumpur and the Government of Malaysia has identified the food processing industry as a critical sector for future economic growth and recovery. Please refer to the most recent FAS Malaysia Food Processing Ingredients annual report for more details on the sector.

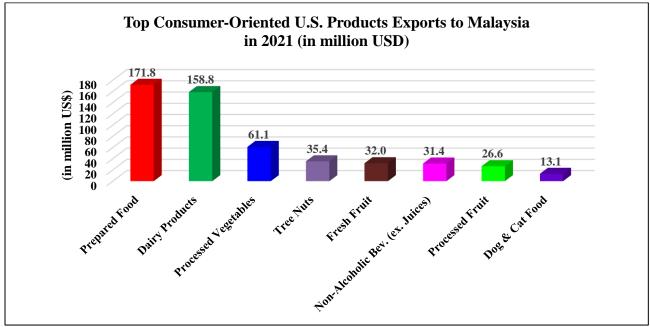

## **Trends and Practices**

- The e-commerce channel has seen significant development due to the pandemic and will continue as businesses are not able to rely on bricks and mortar shop to survive.
- Convenience stores' popularity continues in the food retail sector.
- Malaysia's food service industry is one of the most diverse in the world with a broad range of Asian and Western cuisine widely available in dining formats ranging from food stalls to fullservice restaurants.
- A rapidly growing and highly urbanized population is demanding fast and convenient food choices. Additionally, healthy and organic products are becoming very popular.

- Malaysia's relatively young and educated population frequently enjoys eating out.
- To attract local and international Muslim tourism, most hotels in the country (including international chains) often use only halal certified products in their establishments.
- American chain restaurants dominate Western cuisine options in Malaysia with at least 18 U.S. franchises in operation.
- The economic recovery of the HRI industry throughout the country is expected to support steady growth in demand for imported, high-quality, food and beverage products for the next several years.

# U.S. Food and Beverage Products in the Malaysian Market

According to the Trade Data Monitor, the United States was Malaysia's fifth largest supplier of consumer-oriented food and beverage products in 2021. Total sales reached \$650 million. Top U.S. consumer-oriented food and beverage products in the market include, prepared foods, dairy products, processed vegetables, tree nuts, fresh fruit, and processed fruits.

# Opportunities and Challenges for U.S. Exporters

Opportunities	Challenges
	Many U.S. products need to be halal certified in the Malaysian market, which can be a lengthy process.
The growing Malaysian HRI, Retail and Food Processing sectors require a wide range of imported food products and ingredients.	Australia and New Zealand both have free trade agreements with Malaysia and have a strong presence in the country's consumer-oriented food and beverage market.
driving demand for high quality imported food	In addition to strong competition from Australia and New Zealand, products from China and other ASEAN countries are gaining market share.
	Many U.S. exporters are unfamiliar with the market and therefore face an uphill battle to understand and meet specific requirements and order sizes. Competitors often have more experience with these requirements.
